15. Appendectomy	50

Foreword

Personal Health Choices is a joint publication of Comagine Health and the Nevada Health Authority. This report presents general acute care hospital outpatient surgery discharge billing records data for 15 common outpatient surgeries as reported by Nevada’s general acute care hospitals that discharged patients within the period.

The data are available through the standard uniform billing form, which is utilized by hospitals to bill for hospital charges. The data include patients who were admitted to a hospital for an outpatient surgery. The data identify billed charges, not the actual payments received by the hospital.

The data were compiled by Comagine Health using information from outpatient hospital billing records. This information was gathered and analyzed as part of a contractual agreement between the Department of Health and Human Services and Comagine Health under the authority granted in Section 439B of the Nevada Revised Statutes. Comagine Health reviews the data and requests corrections when errors are found. It is not possible to detect all errors. Comagine Health is not responsible for errors that cannot be found by a review.

Personal Health Choices, Calendar Year 2022 through 2024

Book 4 – General Acute Care Hospitals, Outpatient Surgeries
Published September 2025

Introduction

Book 4 of Personal Health Choices compares 38 of Nevada's general acute care hospitals with respect to 15 common outpatient surgeries, defined using CPT and HCPCS procedure codes (see below). The definitions used in this report can be found on the narrative page for each outpatient surgery grouping.

Defining the Outpatient Surgery Categories

In December of 2021, the Agency for Healthcare Research and Quality (AHRQ) published a statistical brief that reported the top 20 surgical procedures performed by hospital-owned outpatient facilities in 2019. Comagine Health used this report as the basis for selecting the top 15 surgeries for this report.

Comagine Health staff with clinical expertise mapped the hospital procedure codes found in the UB04 data to the 15 top surgical procedures. This mapping was used to categorize the surgeries for this report.

For a copy of the procedure code mapping, please contact Comagine Health.

Here is a link with more information on the AHRQ statistical brief: <https://hcup-us.ahrq.gov/reports/statbriefs/sb287-Ambulatory-Surgery-Overview-2019.pdf>

Additional Information

Personal Health Choices is intended as a source of information regarding the billed charges of hospitals in Nevada and should not be construed as a definitive guide for selecting a hospital to receive medical care. The financial information in this report is based on the hospital billed charges and not the amount that was actually paid to the hospital. Billed charges and paid amounts can differ significantly. This report provides the reader information about one component of health care pricing: hospital charges for outpatient surgeries. Professional physician and other non-hospital inpatient ancillary health care services are not covered in this report.

Report Navigation

This report includes outpatient surgeries from acute care hospitals where the surgery occurred from calendar year 2022 through calendar year 2024.

Each BETOS group is introduced with a short narrative that describes the BETOS codes included in the group. The narrative information is based on the available data and contains information related to the outpatient surgery.

After the narrative, a series of tables and charts are presented that include the number of discharges and the average billed per discharge for the BETOS group. The first table presents statewide averages along with gender and age breakdowns. The first table is followed by three charts to illustrate that same information. Following the charts will be three tables that contain the information by hospital for Clark County, Carson City/Washoe County and rural counties.

It should be noted that when comparing hospitals, information based on small numbers of cases cannot provide a reliable statistical base upon which information can reflect a given hospital's experience. Rows that include five or fewer discharges are suppressed in this report, but caution should still be used when interpreting the data.

Further, physician charges (including those of surgeons) are normally separate from hospital charges, except in rural areas where some physician services — such as radiology, anesthesia, and laboratory tests — may be included in the hospital charges.

Comagine Health receives patient discharge records directly from all the hospitals included in this report.

General Acute Care Hospitals

Hospital Name	Address	Phone Number	County
Banner Churchill Community Hospital	801 E. Williams Ave., Fallon, NV 89406	(775) 423-3151	Churchill

Outpatient Surgeries – Discussion and Graphics

1. Lens and Cataract Procedures

Definitions: Cataract surgery is a procedure to remove the lens of the eye and, in most cases, replace it with an artificial lens. A cataract causes the lens to become cloudy when it is typically clear. Cataracts can eventually affect vision. Cataract surgery is performed by an eye doctor, also called an ophthalmologist. This section contains cataract surgeries and similar procedures.

2. Hysterectomy, Abdominal and Vaginal

Definition: A hysterectomy is a surgical procedure to remove the womb (uterus). You'll no longer be able to get pregnant after the operation. If you have not already gone through the menopause, you'll no longer have periods, regardless of your age. It's more common for women aged 40 to 50.

3. Cholecystectomy and Common Bile Duct Exploration

Definitions: A cholecystectomy is surgery to remove your gallbladder. The gallbladder is a small organ under your liver. It is on the upper right side of your belly or abdomen. The gallbladder stores a digestive juice called bile which is made in the liver. This section also includes procedures related to the common bile duct. The common bile duct is a small, tube-like structure formed where the common hepatic duct and the cystic duct join. Its physiological role is to carry bile from the gallbladder and empty it into the upper part of the small intestine.

4. Inguinal and Femoral Hernia Repair

Definitions: A femoral hernia is a bulge in the upper part of the thigh near the groin. Inguinal hernia is the result of an organ, usually bowel, protruding through a weak point or tear in the thin muscular abdominal wall.

5. Hernia Repair Other than Inguinal and Femoral

Definitions: This section captures other types of hernias other than inguinal or femoral. The hiatal hernia occurs when part of the stomach pushes up into the chest through the opening in the diaphragm (the layer of muscle separating the stomach from the chest) where the esophagus (food pipe) passes through. It is sometimes called a hiatal hernia. The umbilical hernia occurs when the bowel or abdominal tissue pushes through the abdominal wall near the belly button (naval). Umbilical hernias are more common in newborns. The incisional hernia occurs when the bowel or other abdominal tissue pushes through the abdominal wall where it's been made weak by surgery or trauma. The epigastric hernias is when abdominal fat pushes through the abdominal wall between the belly button and below the rib cage.

7. Arthroplasty, Therapeutic Procedures on Joints

Definitions: Arthroplasty is a surgical procedure to restore the function of a joint. A joint can be restored by resurfacing the bones. An artificial joint (called a prosthesis) may also be used. Various types of arthritis may affect the joints.

10. Procedure on Tonsils, Tonsillectomy, Adenoidectomy

Definitions: A tonsillectomy is surgery to remove the tonsils. Tonsils are lumps of tissue on both sides of the back of the throat that help the immune system protect the body from infections. An adenoidectomy is the surgical removal of the adenoids, which are a patch of tissue that sit in the back of the nasal cavity. Like tonsils, adenoids help keep your body healthy by trapping harmful bacteria and viruses that you breathe in or swallow.

12. Insertion, Revision, Replacement, Removal of Cardiac Pacemaker or Cardioverter/Defibrillator

Definitions: A cardiac pacemaker is a small, battery-powered device that prevents the heart from beating too slowly. The device is placed under the skin near the collarbone. A pacemaker also is called a cardiac pacing device. An implantable cardioverter-defibrillator (ICD) is a small battery-powered device placed in the chest. It detects and stops irregular heartbeats, also called arrhythmias. An ICD continuously checks the heartbeat. It delivers electric shocks, when needed, to restore a regular heart rhythm.

15. Appendectomy

Definitions: An appendectomy is the surgical removal of the appendix, which is located in the right lower side of the abdomen. This operation is usually carried out on an emergency basis to treat appendicitis (inflamed appendix). This may occur as a result of an obstruction in part of the appendix.
